

MANAGEMENT, MASTER OF SCIENCE (MS)

This program is designed for students looking to start or enhance a career in management. It is an accelerated, 12-month cohort program that will start in the fall and end summer quarter – each course is six weeks. There will be opportunities for students to interview for 9 month or longer internships with local Spokane businesses looking to hire students to become permanent members of their teams; all internships will be paid by the employer. Students who are already employed may use their current job to fulfill the internship credit requirements.

The Master of Science in Management program serves its students and fulfills the university's mission by:

- educating students to enhance their opportunities for career change, promotion to higher levels of management, and positions of leadership;
- engaging students in a quality program of learning that is affordable and convenient for students from the local region;
- providing practical experiences to students through class projects with local businesses, internships, and relevant case studies which relate their learning to the real world.
