

ENVIRONMENTAL SCIENCE MAJOR WITH ENVIRONMENTAL BIOLOGY OPTION, BACHELOR OF SCIENCE (BS)

Environmental Science is an interdisciplinary field that combines physical, chemical and biological sciences with social, political and economic understanding needed to study the environment and address environmental problems. The Environmental Science program integrates classroom work in biology, chemistry, geology and social sciences (economics and planning) with extensive field, lab and research experience. All students take a core of Environmental Science courses complemented by a concentration in one of the three core sciences (biology, chemistry, and geology). Motivated students have the opportunity to obtain a double major in both Environmental Science and their concentration area. Graduates leave Eastern with the necessary professional and technical skills for employment in the environmental profession or entry into graduate or professional school.

Major Requirements for Environmental Science

All Environmental Science students must take a junior year (ENVS 300) and a final senior year environmental seminar (ENVS 400). After declaring environmental science as a major each student should meet with an advisor as soon as possible. Students should start the program with the necessary mathematics background to enter into the calculus or statistics sequence (i.e. MATH 141 or equivalent). It is recommended that students take ENVS 100, BIOL 171–BIOL 173, CHEM 151–CHEM 153 and GEOL 120 and GEOL 121 within the first two years. Students must maintain an overall GPA ≥ 2.50 to remain in the program.

Note: some course options may not result in there being 60 upper division credits required for graduation within the major–advisor consultation is required.

Environmental Science Required Courses

BIOL 171	BIOLOGY I	5
BIOL 172	BIOLOGY II	5
BIOL 173	BIOLOGY III	5
BIOL 270	BIOLOGICAL INVESTIGATION	3
BIOL 440	ECOLOGY	4
CHEM 151	GENERAL CHEMISTRY	5
CHEM 152	GENERAL CHEMISTRY	5
CHEM 153	GENERAL CHEMISTRY	5
DSCI 245	DATA ANALYSIS FOR BUSINESS	4-5
or MATH 380	ELEMENTARY PROBABILITY AND STATISTICS	
DSCI 346	ADVANCED DATA ANALYSIS FOR BUSINESS	4-5
or MATH 161	CALCULUS I	
ECON 100	GENERAL EDUCATION ECONOMICS	5
ENVS 100	INTRODUCTION TO ENVIRONMENTAL SCIENCE	5
ENVS 300	ENVIRONMENTAL SCIENCE JUNIOR SEMINAR	1
ENVS 400	ENVIRONMENTAL SCIENCE SENIOR SEMINAR	1
GEOG 323	GIS FOR ENVIRONMENTAL SCIENCES	3
GEOL 120	PHYSICAL GEOLOGY - THE SOLID EARTH	5

GEOL 121	PHYSICAL GEOLOGY - SURFICIAL PROCESSES	5
GEOL 320	ENVIRONMENTAL GEOLOGY	4-5
or GEOL 380	WORLD RESOURCES AND POPULATION	
GEOL 470	HYDROGEOLOGY	4
PLAN 431	ENVIRONMENTAL IMPACT STATEMENTS	3

Environmental Biology–Required General Biological Knowledge–choose one of the following

BIOL 301	MICROBIOLOGY	
BIOL 302	BOTANY	
BIOL 303	INVERTEBRATE ZOOLOGY	
BIOL 304	VERTEBRATE ZOOLOGY	

Capstone

BIOL 490	SENIOR CAPSTONE	5
----------	-----------------	---

Electives–Upper division electives with advisor's consent.

Total Credits		106-109
---------------	--	---------

For information on General Education, see Undergraduate Degree (<http://catalog.ewu.edu/archives/2015-2016/undergraduate-degree>) .

Student Learning Outcomes—students will

- develop an integrated knowledge of major concepts in the area of environmental sciences and an understanding of fundamental roles that biology, chemistry, and geology play in environmental science;
- demonstrate knowledge of the interrelationships among the physical and biological components of ecosystems;
- use epistemologically sound quantitative techniques for the analysis of biotic and abiotic samples and systems;
- demonstrate effective oral, graphical, and written communication abilities, and critical thinking skills as related to the environmental sciences;
- develop sufficient preparation in the environmental sciences to successfully compete in a graduate or professional program, or to realize employment in an environmental sciences-related career.
