OCTH 101. INTRODUCTION TO OCCUPATIONAL THERAPY. 2 Credits.
This course is to provide an overview of occupation, the practice of occupational therapy, disability awareness, and community supports for individuals with disabilities. The students will become aware of the diversity of occupational therapy practice, practice environments, and occupational therapy practitioners.

OCTH 292. FOUNDATIONS OF DOCUMENTATION AND MEDICAL TERMINOLOGY FOR THE REHABILITATION PROFESSIONAL. 2 Credits.
This course is an intensive review of human anatomy and physiology as it pertains to the practice of occupational therapy. It is designed to provide the student with an opportunity to learn anatomical structures and the functional relationships of these structures to each other. Cadaver dissection is a critical component of all labs.

OCTH 501S. APPLIED HUMAN ANATOMY FOR OCCUPATIONAL THERAPY. 4 Credits.
This course is an overview of human anatomy and physiology as it pertains to the practice of occupational therapy. It is designed to provide the student with an opportunity to learn anatomical structures and the functional relationships of these structures to each other. Cadaver dissection is a critical component of all labs.

OCTH 502S. CLINICAL KINESIOLOGY AND BIOMECHANICS. 3 Credits.
This course is an overview study of human movement in a person/environment context. The study of the normal biomechanics and kinesiology of the musculoskeletal system is seen as a prerequisite to the application of assessment procedures, data collection, and assessment interpretation for the planning of therapeutic interventions in occupational therapy. Incorporation of clinical problems and pathokinesiology are also included through a structured inquiry-based case study process. The lab portion of the course is designed to train students in the basic principles and application of manual muscle testing, goniometry, and principles that enhance strength and activity tolerance. To enhance student learning, designated assignments, and course laboratory activities. Application of content knowledge and a synthesis of how it relates to occupational performance will be emphasized. Students will be expected to use the Occupational Therapy Practice Framework: Domain and Process as a mechanism for expressing physical performance elements in the practice of occupational therapy.

OCTH 503S. APPLIED NEUROLOGY FOR OCCUPATIONAL THERAPY. 3 Credits.
This course is an overview of the neurological function and process in the human body. Normal neurologic development throughout the lifespan will be the primary focus. Application of knowledge concerning neurological process and occupational performance will be emphasized.

OCTH 504S. OCCUPATIONAL THERAPY THEORY AND FOUNDATIONS. 4 Credits.
This course introduces students to the current occupational therapy practice framework, which defines domain and process. It provides opportunities to understand the historical and current evolution of occupational therapy’s philosophy and theory development, along with the contributions of theorists within the profession. Students will learn the process of theory development and analyze selected practice models and frames of reference for application to occupational therapy evaluation and intervention. The course will also explore the application and importance of occupational therapy practice models and frames of reference to the development of new knowledge, ongoing research, and the advancement of the profession.

OCTH 505S. IMPACT OF HUMAN DISEASE ON OCCUPATIONAL PERFORMANCE. 1 Credit.
This course provides an overview of human disease and injury processes occurring throughout the lifespan. The etiology, course, prognosis, treatment, and management of each condition will be explored. The course is designed to introduce the student to a variety of injuries and disease processes encountered in the field of occupational therapy. Emphasis will be placed on providing necessary, precautionary, and practical information of each disease within a framework of group process and problem solving related skills. Further, the impact of disease and injury on occupational performance and quality of life will be explored. Considerations for the practice of occupational therapy will be discussed with a focus on clinical judgment, team collaboration and global treatment interventions.

OCTH 506S. PRACTICE SKILLS AND ETHICS. 1 Credit.
Notes: graded Pass/Fail.
This course is designed to provide entry level occupational therapy students’ knowledge and skills in practice skills and policy. The course will focus on four main elements of practice including basic clinical skills, clinical writing and documentation, professional roles and policy, and ethics. The intent is for the student to establish basic skills that can be further developed in practice specific courses to enable them to demonstrate entry-level practice competencies.

OCTH 507S. ANALYSIS AND SYNTHESIS OF OCCUPATIONAL PERFORMANCE. 3 Credits.
This course will teach students how to analyze daily activities and discover their therapeutic value to support intervention strategies with persons who are experiencing dysfunction in occupational performance. Students will integrate theory and knowledge of OT Practice Framework to progress to in-depth analysis of occupational performance. Students will learn how to synthesize information from a variety of sources and apply it to creating, adapting, and grading therapeutic activities.

OCTH 510S. GROUP PROCESS. 3 Credits.
This course focuses on developing several advanced skills of professional communication and behaviors. Emphasis is on: a) intentional use of self; b) group facilitation; c) group process; d) interpersonal communication; d) skills in motivational interviewing; and e) a reflective evaluation process used for building interpersonal communication skills. Advanced professional communication skills and group design/process skills are necessary tools for emerging and traditional practice arenas in occupational therapy.
OCTH 512S. FIELDWORK II SEMINAR. 2 Credits.
This course will focus on preparation for the transition from classroom to Fieldwork Level II (FW II) experiences. Students will have the opportunity to identify and analyze the Level II fieldwork expectations, explore the supervisory and interdisciplinary team relationships, review professional and ethical behavior, develop a Level II Fieldwork Portfolio, review AOTA, NBCOT and the state of Washington licensure requirements and begin preparation for job searches.

OCTH 515S. INTER-PROFESSIONAL AND CROSS-CULTURAL LEARNING FOR OCCUPATIONAL THERAPY. 1-2 Credits.

Notes: The 1 credit seminar portion of the course is required within the MOT Program. Students participating in an immersive service-learning experience will register for 2 credits.

Pre-requisites: Participation in the optional immersive service-learning opportunity requires faculty approval and that the student be in good standing in the Masters of Occupational Therapy (MOT) program.
Students enrolled in the 3+2 program are eligible to enroll.

This is a customized course designed to facilitate participation in inter-professional (IP) and cross-cultural learning opportunities. This course will run in conjunction with related courses in other health care and public health programs and will require each student to participate in IP and cross-cultural learning experiences.

OCTH 520S. PRINCIPLES OF EVIDENCE BASED PRACTICE. 1 Credit.

Notes: graded Pass/Fail.
This is the first of two courses designed to introduce the student to evidence based practice and the process of critical inquiry. This course will be offered in an interdisciplinary format with the Department of Physical Therapy. These courses will prepare the student to become a knowledgeable consumer of research and the professional literature as it relates to the practice of occupational therapy. In this course the student will develop competence in identifying, locating, retrieving, understanding and applying the principles of research to the practice of occupational therapy.

OCTH 522S. RESEARCH METHODS IN OCCUPATIONAL THERAPY. 3 Credits.

Notes: students pursuing a BS in Exercise Science need to complete the senior capstone specific to those programs.
Satisfies: a university graduation requirement—senior capstone for students pursuing the Interdisciplinary BA Occupational Therapy Track.

This course is designed to introduce the student to the process of critical inquiry regarding research methods across the quantitative and qualitative spectrum. It prepares students to be a knowledgeable consumers of research and the professional literature relating to the practice of OT. It develops competence in critiquing and applying research methods to the application of evidence based practice in OT. Completion of a case study based on current evidence or a research proposal is required.

OCTH 523S. ASSESSMENT AND EVALUATION OF OCCUPATIONAL PERFORMANCE. 3 Credits.

Student will have the opportunity to identify, evaluate, and critically analyze the psychometric properties and application of several of the most commonly used evaluation and assessment tools used in occupational therapy. The course offers the following information and experiences: 1. knowledge of the psychometric principles, 2. analysis of the assessment properties, 3. critical selection of appropriate assessment tools and 4. standardized assessment use and documentation of results.

OCTH 530S. OCCUPATIONAL PERFORMANCE AND MENTAL HEALTH. 4 Credits.

The goal of this course is to provide the learner with the foundations of service provision for working with individuals with mental illness. Varying roles for the occupational therapist will be explored in this practice arena. The lived experience of mental illness and recovery is highlighted. This course is paired with a Level I fieldwork experience which will allow students to apply what they are learning in OCTH 530S in a variety of settings within the community that offer services to persons experiencing mental illness and/or addiction.

OCTH 531S. OCCUPATIONAL PERFORMANCE AND ADULTS. 4 Credits.

This course provides the learner with the knowledge and skills for assessment, intervention, planning, provision of intervention and outcome analysis related dysfunction in occupational performance in adults. The course will focus on the provision of occupational therapy services from young adulthood through geriatrics. Students will learn about disabling conditions, documentation, use of assessment tools/procedures (e.g., evaluation of muscle strength, ROM, ADL/IADL, soft tissue dysfunction, etc.), evidence-based practice, frames of reference and service implementation throughout the continuum of care for this population. Occupational therapy principles and theories will be applied through case studies, classroom discussion laboratory exercises and fieldwork experiences.

OCTH 532S. OCCUPATIONAL PERFORMANCE OF CHILDREN AND ADOLESCENTS. 4 Credits.

This course provides the learner with theories, knowledge and application opportunities related to evaluation, analysis and intervention planning for children with special needs in a variety of pediatric occupational therapy practice settings. The course will focus on the provision of occupational therapy services with infants, children and adolescents. Specific skill building will also focus on evaluation, interpreting evaluation information and designing evidence-based intervention. The analysis of childhood occupations, disabling conditions, documentation, analysis and application of frames of reference and issues of practice leadership will be examined. Occupational therapy principles and theories will be applied to case studies and through analysis and discussion of Fieldwork Level I (FWI) experiences.

OCTH 533S. OCCUPATIONAL PERFORMANCE AND OLDER ADULTS. 3 Credits.

This course is designed to provide the student with an understanding of the theoretical basis and intervention skills applied in the occupational therapy assessment, planning, intervention and consultation for the older adult. The course will address multiple topics related to aging including: 1. a review of the physiological and psychosocial aspects of typical aging and the relationship to occupational performance, 2. the development of occupational therapy evaluation and intervention skills for common health conditions affecting functional performance in the aging population, and 3. special topics in occupational therapy geriatric practice and research. Occupational therapy principles and theories will be applied through case studies, classroom discussion, laboratory exercises and community experiences.
OCTH 540S. HEALTH AND WELLNESS. 3 Credits.
This course provides an overview of occupational performance within a health promotion, wellness and lifestyle medicine framework for both mental and physical wellness. Students will explore opportunities for occupational therapists to promote health and wellness through participation in occupations. Course assignments will highlight traditional and contemporary approaches occupational therapists can use with individual clients and in population health settings. Selected occupational therapy theories and health promotion models will be presented and discussed, including their application to the practice of occupational therapy. Course written assignments will incorporate principles of clinical reasoning, practical clinical applications and professional documentation. Students will explore and evaluate tools and approaches to health and wellness and contribute to creating an online professional resource.

OCTH 541S. TECHNOLOGIES FOR ENABLING OCCUPATIONAL PERFORMANCE. 3 Credits.
This course is designed as a vehicle to help occupational therapy students to integrate previous learning by providing opportunities for occupational assessments, needs identification and the selection and design of both high and low technology devices to maximize client independence in their occupational performance areas. The course is designed to incorporate an inter-professional experience with community members who assist students with creating products and providing technology solutions.

OCTH 542S. LEADERSHIP IN ENABLING OCCUPATION IN DIVERSE SETTINGS. 4 Credits.
This course focuses on leadership and management in diverse settings. The course will provide a foundation for understanding leadership theories, strategies, and styles. It will cover topical areas related to the management of occupational therapy services in both traditional and emerging areas of practice. Opportunities will be offered to explore learners’ current leadership style, and to apply concepts of leadership through completion of a project which serves the needs of a “client” agency, program or department. Comparisons between leadership and management will be discussed, with the underlying concept that a strong leadership foundation is critical to successful management. Current themes, opportunities and challenges for both leadership and management will be explored.

OCTH 595S. CLINICAL FIELDWORK I. 1 Credit.
Notes: Must be repeated three times for a total of 3 credits. Graded Pass/Fail.
The Clinical Fieldwork Level 1 introduces students to the fieldwork experience, integrates application of classroom knowledge to the clinical setting and offers opportunities in developing a therapeutic rapport and understanding the needs of client.

OCTH 599S. DIRECTED STUDY. 1-4 Credits.
Independent and directed study.

OCTH 601S. PROFESSIONAL PROJECT I. 3 Credits.
Notes: graded Pass/Fail.
This is the first in a series of two courses in which students are engaged in synthesis Capstone projects to support the requirements for the Master of Occupational Therapy degree. Students will establish timelines for completion of their project which may be done in either group or individual format linked to one of the three threads: 1. research, 2. clinical skills, or 3. community engaged scholarship. Faculty mentors work with students to determine semester goals.
