ATHLETIC TRAINING, MASTER **OF SCIENCE (MS)**

The Master of Science in Athletic Training (MSAT) program at Eastern Washington University is designed to produce intelligent, dedicated, and motivated health care professionals who will work competently with diverse populations in a variety of athletic training and sports medicine settings. To complete this goal, the program will provide students with periods of full-time clinical engagement; a strong foundation in scientific knowledge including prevention, diagnosis, treatment and rehabilitation of injuries and illness; and opportunities to work side by side with a variety of faculty and staff in a variety of educational and clinical settings.

The program is nationally accredited by the Commission on Accreditation of Athletic Training Education (CAATE) with our next accreditation cycle occurring in the 2027-28 academic year.

Degree Completion

Eastern Washington University's Department of Wellness and Movement Sciences in the College of Health Science & Public Health offers two paths for completion of the Master of Science in Athletic Training degree.

A 3+2 Dual-Degree Option where students first complete all requirements for graduation from the Exercise Science: Pre-Athletic Training option, and then apply during their third or Junior year to transition into the Master of Science in Athletic Training program. This is an intensive full-time format that integrates coursework and clinical experience and it is recommended that students interested in the 3+2 degree option meet frequently with their Exercise Science faculty advisor and also contact the Athletic Training faculty prior to the application process. This degree option provides eligibility and excellent preparation for national certification through the BOC.

A 2-Year Single-Degree Option where students that have already completed their bachelor's degree at Eastern or another accredited institution, can complete the Master of Science in Athletic Training program in a full-time format that integrates coursework and clinical experience and provide students with eligibility and excellent preparation for national certification through the BOC.

The College of Health Science & Public Health also offers:

A Dual Degree in Physical Therapy and Athletic Training: This option allows students to earn both a Doctorate in Physical Therapy (DPT) and a Master of Science in Athletic Training (MSAT). Students completing this program receive two separate degrees and are eligible to sit for certification in both professions. If students elect to complete only one degree at any point in the program, they must then meet all requirements for that individual degree. Students interested in this dual degree program option should contact the Athletic Training faculty prior to the application process for more information.

Admission to the program is based upon evaluation of the student's entire application, including: their academic record, signed statement of ability to meet the Program Technical Standards, completion of prerequisite courses, professional references and a written essay. First review of applications begins February 1st and the final deadline is May 1st each year. The number of applicants may exceed the number of students that can be admitted to the program; therefore, no assurance can be given that all applicants admitted to the university and who complete the application requirements, will be admitted to the MSAT

program. For further information regarding the application process, please call 509.359.2427.

Prerequisites

Prerequisite coursework may be taken at EWU or at any other accredited college, or university. At the time of application, applicants must have completed at least three of the prerequisite courses listed below, and it's highly recommended that anatomy and physiology be among them. All prerequisites must be taken for credit (not through certificate programs).

All prerequisites must be completed satisfactorily prior to entering the program. If you have any questions about these prerequisite courses, please contact us. Please enter all of your prerequisite courses directly on your MSAT application.

Application Requirements

& PHED 352

- · must have completed a minimum of 25 hours working, volunteering, or shadowing with a BOC certified athletic trainer in a high school, college, or professional setting. Preference will be given to applicants that provide proof of AT observations occurring at various healthcare sites and with different athletic trainers;
- must provide a copy of current First Aid and CPR/AED certification;
- must have a cumulative GPA ≥3.0 in a bachelor's degree;
- must earn a minimum grade ≥C in each Human Anatomy and Physiology and Kinesiology course.

Prerequisite coursework (EWU course equivalents listed)

Students must have completed a series (full academic year) of the
following (minimum grade ≥C).

3 (· • • • • • • • • • • • • • • • • • • •
