

MECHANICAL ENGINEERING TECHNOLOGY MAJOR, BACHELOR OF SCIENCE (BS)

This degree combines studies of mathematics, computer science, physics and mechanical engineering technology with an emphasis on applications. The Bachelor of Science in Mechanical Engineering Technology is accredited by the Engineering Technology Accreditation Commission (ETAC) of ABET, <https://www.abet.org> (<https://www.abet.org/>), under the General Criteria and the Mechanical Engineering Technology Program Criteria. Before graduation each student will participate in a design project and an internship in industry to gain industrial experience during their academic career before employment. The emphasis of this program is the application of engineering principles to the solution of practical problems. MET graduates are in great demand and are employed in a variety of interesting, high-tech careers throughout the state and region. Employment opportunities are available in mechanical design, industrial engineering technology, industrial management, manufacturing, CAD, applied research and technical sales and service. The number of majors, pre-majors and graduates for Mechanical Engineering Technology are available on the program website (<https://www.ewu.edu/cstem/ment/mechanical-engineering-bs/>).

Professional Licensing: Completion of the Mechanical Engineering program at EWU, an ABET-accredited program, meets the curricular requirements on the pathway to becoming licensed as a Professional Engineering (PE License) in Washington State. This program requires that students complete the Fundamentals of Engineering Exam (FE). In addition to these requirements, most states, including the state of Washington, require several years of experience working under a licensed Professional Engineer before being qualified to sit for the Professional Engineer (PE) Exam. Licensure requirements differ by state, please refer to each state's licensing board, or contact mechengengineering@ewu.edu for more information.

Minimum Course Grades

Courses that serve as prerequisites to those listed below usually require a minimum grade of C or better. This information can be found in the prerequisites listed for the specific course.

Courses Required to be Completed at EWU

In order to ensure all EWU Mechanical Engineering Technology graduates meet EWU ABET accreditation requirements, all Mechanical Engineering Technology students are required to take MENG 300, MENG 353, MENG 385, METC 415, MENG 412 and MENG 490A/MENG 490B from EWU. Exceptions to this policy will be reviewed on a case by case basis by the Mechanical Engineering Technology curriculum review committee to ensure the student has successfully met the EWU ABET performance indicators required for each course.

Notes: Including university requirements for the degree the above program requires a minimum of 188 credits or an average load of 15.67 credits per quarter, for a 12 quarter, four-year program. The 188 credits are based on the following assumption: a. students have had one year of high school drafting. If this assumption is not true, then the student will have to take METC 102.

Grade Requirements: In order to graduate, students majoring in the department must earn an average GPA ≥ 2.5 in all courses required for this major (all courses in the list below).

Plan of Study

The following plan of study is for a student with zero credits. Individual students may have different factors such as: credit through transfer work, Advanced Placement, Running Start, or any other type of college-level coursework that requires an individual plan.

Courses may be offered in different terms and not all courses are offered every term, checking the academic schedule is paramount in keeping an individual plan current. There may be some courses that have required prerequisites not listed in the plan, review the course descriptions for information. **Students should connect with an advisor to ensure they are on track to graduate.**

All Undergraduate students are required to meet the Undergraduate Degree Requirements (<http://catalog.ewu.edu/undergraduate-degree/>).

Total Credits 180-181

¹ University Graduation Requirements (UGR) and Breadth Area Course Requirements (BACR) courses may be less than 5 credits and additional credits may be required to reach the required 180 total credits needed to graduate. Students should connect with an advisor to ensure they are on track to graduate.

Application for Graduation (use EagleNET (<https://inside.ewu.edu/eaglenet/>)) must be made at least two terms in advance of the term you expect to graduate (undergraduate and post-baccalaureate).

Use the Catalog Archives (<http://catalog.ewu.edu/archives/>) to determine *two important catalog years*.

Requirements in Degree Works (<https://inside.ewu.edu/records-and-registration/degree-works/>) are based on these two catalog years:

- a. The catalog *in effect at the student's first term* of current matriculation is used to determine **BACR** (Breadth Area Credit Requirements) **and UGR** (Undergraduate Graduation Requirements).
- b. The catalog *in effect at the time the student declares a major or minor* is used to determine the program requirements.

Students who earn a BS in Mechanical Engineering Technology from EWU should be able to:

- solve a wide range of applied engineering problems using what they learned both in school and after graduation;
- find the information they need in order to develop problem solutions;
- lead projects and small teams by serving as a liaison between the more technical and applied aspects of engineering and manufacturing;
- use their skills as an Engineering Professional to benefit society in whatever career path they choose.

The most current Program Educational Objectives (PEOs) and Program Learning Outcomes (PLOs) are available on the program web page (<https://www.ewu.edu/cstem/ment/mechanical-engineering-technology-bs/>).
